About the Conference and CAHMR

This Conference is supported by a funding of HKD2.45 million under the Institutional Development Scheme (IDS) of the Competitive Research Funding Schemes for the Local Self-Financing Degree Sector in 2018/19 of the Research Grants Council (RGC) to establish the Centre for Ageing and Healthcare Management Research (CAHMR) [Ref. no.: UGC/IDS24/18]. The School of Professional Education and Executive Development (SPEED) under CPCE (College of Professional and Continuing Education) is the grantee of this research funding. CAHMR will be inaugurated at the Opening of the Conference.

CAHMR will leverage the expertise and interest among faculty members, connecting them from a diverse array of disciplines and cultivating their scholarship in the realms of health care, health services management, finance, information technology, data science, public policy, marketing and hospitality management. The goal is to develop CAHMR into a centre of excellence with four fundamental objectives:

1. Generating novel and useful knowledge;
2. Developing research capabilities of faculty members;
3. Sharing insights with stakeholders; and
4. Informing curriculum development across related academic programmes.

Welcoming Remarks

Professor Peter P. YUEN

Dean, College of Professional and Continuing Education (CPCE);
Professor, Department of Management and Marketing,
The Hong Kong Polytechnic University

"It gives me much pleasure to welcome you to the CPCE Health Conference 2019: "Towards a More Humanistic, Holistic and Integrated Model of Care". The CPCE Health Conference was first organised in 2016. We have explored issues relating to ageing, sustainability, healthcare delivery and financing reform, and healthcare quality. The conclusions from these four conferences are clear: our healthcare system needs to be drastically overhauled. The status quo is not an option. This year, the Conference is supported by a grant from the Research Grants Council (RGC) to establish the Centre for Ageing and Healthcare Management Research (CAHMR) under PolyU SPEED. The new research centre will leverage the expertise among our faculty members, connect them to a diverse array of disciplines including healthcare, health services management, finance, information technology, data science, public policy, marketing and hospitality management, in a common effort to tackle complex issues in ageing and healthcare management. This Conference is the Inaugural Conference for the Centre. We are privileged to have academics and experts from Australia, Chinese Mainland, Hong Kong, Japan, Korea, Singapore, Thailand, United Kingdom, and the United States of America here with us today. There will be eleven plenary presentations (six in the morning and five in the afternoon), six concurrent sessions with 30 presentations and six poster presentations. Around 200 participants have registered. I would like to express my sincere appreciation to the Conference Organising Committee, our co-organisers, our sponsors, our supporting organisations and my colleagues at CPCE for making this happen. I wish to thank all participants for coming to the Conference. It is indeed our great pleasure to see so many old friends and new like-minded friends in this event. As we are in January 2019, I wish to take this opportunity to wish everyone a Happy New Year and Good Health and an enjoyable and fruitful day at CPCE!"

Dr Zhanming LIANG

Senior Lecturer, School of Psychology and Public Health, La Trobe University; President, the Society for Health Administration Programs in Education (SHAPE), Australia; Fellow, Australian College of Health Service Management, Australia

Integrated Care Across Boundaries – Experience and Lessons from Australia

Dr Liang has spent the last decade researching and teaching in the areas of management competency, evidence-informed decision-making, health management workforce development, healthcare quality, and program planning and evaluation. Prior to becoming an academic, she worked in diverse roles as a medical practitioner, a planning and evaluation consultant and a senior manager. Dr Liang has been the leader of the Management Competency Assessment Partnership (MCAP) Program, which has resulted in the development and validation of an evidence-based Managerial Competency Assessment Tool. The MCAP Tool can assess the competence of middle and senior level managers working in the health sector and provide evidence to guide the direction of management training and development. In the past three years, Dr Liang has been working with partners in China and Thailand to develop the capacity in health service management training, education and research in both countries. The book she co-authored with colleagues entitled 'Project management in health and community services: getting good ideas to work' has been recognised as the best project management book for the health sector in Australia and adopted as a textbook by majority of the Master of Health Administration Programs in Australia. The new 3rd edition of the book will be published in early 2019. The book has also been translated into Chinese and published by The People's Medical Publishing House, China.
